

## Collaborative Analytics Lab

For Data Science, Cognitive Computing, Machine Learning, Artificial Intelligence, Predictive Modeling, Data Mining & Computer Vision

Take advantage of these game-changing technologies.

Have world-class tools at your disposal, plus experts who can use them to take your business to the next level.

A highly trained team and a world class platform can be yours - sooner and cheaper than you think. A team of experts from First Analytics will get you up and running with the latest, most advanced tools for data science, machine learning and AI on a secure, flexible, cloud-based platform and start moving new opportunities forward.

### Why?

Have a well-equipped and well-staffed advanced analytics shop.

Completely turn-key, or as extension of your existing team.

Access a team of experts and tools to accelerate your efforts to:

- Identify and qualify opportunities
- Test and prove ideas
- Develop and deploy solutions

Experience a collaborative, creative approach to creating and deploying solutions using the most advanced technologies.

### Find opportunities...

- Understand what these emerging technologies can do for you.
- Put opportunities to the test with your own data.

### Develop & deploy solutions...

- Move from innovation to implementation.
- Seamless transition of team and platform.

### ...at an affordable cost

- Little (or no) startup cost
- Cloud platform and team of experts are continuously right-sized.

#### Nimble

Move on opportunities quickly.

#### Flexible

Size & mix of the team continuously adjust to meet your needs.

#### Collaborative

An extension of your own team.

*We've worked with First Analytics for years. They help us frame solutions for new opportunities, bring in expertise we don't have and collaborate with our own advanced analytics team. They provide "flex capacity" when our project workload piles up. They introduce us to advanced tools, methods, and capabilities that help us tackle opportunities we might not have been able to handle on our own.*
